What is Garden Club?

The Cal Poly Garden Club is a Student-Run Club that helps run the Student Experimental Farm on the campus of California Polytechnic State University, San Luis Obispo. We specialize in educating others about the wonders of gardening and the many ways it can be incorporated into our daily lives. Though it is a Student-Run Club, anyone and everyone is welcome to join! If you have a passion for gardening or are wanting to learn with a fun group of people, come on out!

Come to one of our Plant Sales!

We offer the goodies below:

- Fresh Produce
- Medicinal Tinctures
- Organic Farm Eggs
- Farm-Made Goods

Many of the proceeds go to the Garden Club, but the rest is usually donated to a local Community Activist Organization!
